Dear Sir or Madam,

I am writing to give my full recommendation without any hesitation for Shufelberger Construction, Inc. I selected Mike Shufelberger and Shufelberger Construction, Inc. to build our custom home in Red Bluff, CA and I am still very happy with that decision. I made the decision to use Mike as our contractor over the others because I believed that he had the experience and knowledge to take on a home of this size (8,000sf) and difficulty. The project was completed in 15 months and everything was handled in a timely manner. The job was started during the rainy season which brought some interesting challenges at the beginning of the job. Mike handled the issues promptly and came up with a solution that worked the first time.

I was encouraged to be involved with the project from the beginning. Any changes that I requested were handled promptly and I received written change orders with a breakdown of extra cost if there was going to be a cost difference.

The coordination of the Subcontractors was done without a hitch. They were all onsite when needed and worked together seamlessly. The staff from Shufelberger Construction were always there making sure that little issues never turned into big problems. When an issue did come up, it was handled promptly and everyone that was involved was there to determine the best solution for the issue.

All of the finish work was done by Mike's own crew. The finish work was done with great attention to detail and the crew did not take any shortcuts. I am very happy with the end result and believe that this completes the feel of our home.

Again, I am pleased to recommend Mike Shufelberger and Shufelberger Construction to be the contractor for your project. Feel free to contact me with any questions regarding my recommendation.

Sincerely,

Ron Michaelis
